To The Alumni

In an effort to renew old acquaintances, I recently sent you an informational form to be completed and returned. Your response to this has been most gratifying; to date, I have received nearly 500 forms and additional ones are arriving every day. While scanning the returns, I found myself being brought up to date on the lives and careers of many old friends. On the assumption that many of you would enjoy the same experience, I have asked the alumni office to develop this first issue of *ALUMNI NEWS*. I hope you will rediscover a long lost friend while thumbing through the pages.

The *NEWS* is coming to you with the first issue of *System 1*, a magazine designed to report the latest developments at Rush-Presbyterian-St. Luke's Medical Center. You will find stories which outline the progress we are making toward developing a health university directly linked to an operating health delivery system. In the last two years, Rush-Presbyterian-St. Luke's Medical Center has assumed a role that will make it a major influence upon the quality of health care delivered to our people. By your early work at RPSL, you share in the fulfillment of its potential. I hope you enjoy reading these two publications.

Sincerely,

Frederic A. dePeyster, M.D.
President, Medical Staff
